Heavy Crimping Tools

Delphi Power Pack Connectors meet the increasing demand for high-current/high-power connections systems. High-current/high-voltage sealed systems can be used to help address component electrification issues in hybrid electric vehicles.

Commercial vehicles including construction and agricultural vehicles are exposed to extremely harsh environments and the sealing of high-current systems is critical. Power Pack Connectors can also help the transportation market increase plant efficiencies and eliminate labor related to ring terminal systems.

Hydraulic crimping tool HPZ 80.1

- Hydraulic two-hand crimping tool in plastic case, for crimping copper and aluminium conductors with cross-sections 10 – 400 mm²
- 180° rotating crimping head hinges for changing connector and die
